## BIOBLING AND H2ENGINE

6:04 pm, Jul 22, 2005 by *ThePete*

First, [here's an article](#) at [LAWeekly.com](#) about a woman who runs a business that hooks people up with cars that she helps convert to be powered by bio-fuels like ethanol or even corn oil. This is great except that for now gas is still, sadly, cheaper than corn oil. Check out the article for more. Want to use her company? Check out [BioBling.com](#)

Next up, we have a [post](#) at [SpiritOfMaat.com](#) that tells how to run a car engine on water. No kidding. I don't know much about cars, but it seems to make sense. If it works, it's no wonder we don't use it. That would actually be *logical* and *there's simply no place for logic here on Bizarro World*.
